Brecht died an early death at the age of 58 in [[1956]], leaving a legacy which has been taken up by nearly every country in the world, particularly those where political activity is occurring. His humour and scepticism combined with Gestic and Epic techniques have proved as fruitful as confusing to those who try to produce his works or in his style. Some of his innovations, though, have become so commonly taken on that one hardly remembers the lack of them before him.
